Social Entrepreneurship Policy in Korea, Japan, China, the United Kingdom, the United States, France and Germany, 2022

Entrepreneurial Ecosystem Policy Review (EEPR), 10(2)

Sources:
Governments of the Republic of Korea, Japan, the People's Republic of China, the United Kingdom, the United States, France and Germany, with their legislatures, France's Court of Audit, the Japan Finance Corporation and, in China, a central office of the Communist Party

Summary: This report reviews the social entrepreneurship policy that the governments of Korea, Japan, China, the United Kingdom, the United States, France and Germany set out from January to December 2022 in six domains — regulation and law, finance, culture, support, human capital and markets — and analyses it in its context, against theory and in practice. No government created a legal form for social enterprise: Korea announced that certification would give way to registration, Japan's worker cooperatives took effect in October, China's Charity Law revision was pending and Germany's pledges produced no bill. Finance was strongest where it ran through funds and public lenders, in Korea and the United States, while Germany's programme for social enterprises announced for the year had spent nothing by October. Public purchasing was the least realised lever, social value in procurement was mostly promised, and culture and human capital were the thinnest domains.

Social Entrepreneurship Policy in Korea, Japan, China, the United Kingdom, the United States, France and Germany, 2022

Abstract

This report reviews and analyses the social entrepreneurship policy of the governments of the Republic of Korea, Japan, the People's Republic of China, the United Kingdom, the United States, France and Germany in their own plans, laws, budgets and announcements. The policies are reviewed in six domains — regulation and law, finance, culture, support, human capital and markets — and analysed in their context, against theories of social entrepreneurship, non-profit enterprise, social procurement and policy design, and in practice. No government created a legal form for social enterprise. Korea announced that certification would give way to registration, Japan's Workers' Cooperatives Act took effect on 1 October while a new corporate form was only to be studied, China's Charity Law revision was pending, and Germany's pledges on legal forms and a national strategy produced no bill or strategy. Finance was strongest where it ran through funds and public lenders: Korea formed its eighth social enterprise investment partnership, and the United States appropriated USD 324 million for its community development lenders' fund and allocated USD 5 billion of tax credits. The United Kingdom allocated GBP 44 million of dormant assets but left the causes for most of the new money undecided, and Germany's programme for social enterprises, announced for the year, had spent nothing by October. Public purchasing was the least realised lever, work integration was strongest in France and the United States, culture and human capital were the thinnest domains, and governments reported outputs rather than social outcomes. The period covered is January to December 2022.

Keywords

social enterprise, social and solidarity economy, certification, worker cooperatives, dormant assets, community development finance, impact investment, social organisations, social value procurement, work integration, pay for success

1 INTRODUCTION

Key findings

- No government created a legal form for social enterprise. Korea confirmed on 16 December a plan to replace social enterprise certification with registration, without a bill; Japan's Workers' Cooperatives Act took effect on 1 October, while a corporate form for social entrepreneurs was only to be studied; China's Charity Law revision was pending; Germany's legal pledges produced no bill; and France recomposed the Higher Council of its social and solidarity economy (SSE) but did not reform its approval of solidarity enterprises.
- Finance was strongest where it ran through funds and public lenders. Korea formed an eighth social enterprise investment partnership of KRW 6.0 billion; the United States appropriated USD 324 million for the CDFI Fund for fiscal year 2023 and allocated more than USD 5 billion of New Markets Tax Credits; Japan's public lender made 8,134 social business loans in the first half of fiscal year 2022, while its loans to NPO corporations fell.
- Dormant money grew but was little spent on new causes. The United Kingdom allocated GBP 44 million and enacted a wider scheme, but the causes for about GBP 738 million in England were still under consultation; Japan proposed equity from dormant deposits; Germany pledged to use dormant accounts.
- Much of the year was announcement. Germany's REACT with impact, announced for 2022, had spent nothing by October against EUR 9 million expected, and its national strategy was promised, not adopted; France enacted its Finance Act for 2023 on 30 December, but its SSE line is shown only in the bill, at EUR 19.22 million of commitments, almost unchanged.
- Public purchasing was the least realised lever. Korea's public institutions bought 2.77 % of their purchases from social enterprises in 2021, its central bodies 0.78 % in a year of large vaccine purchases; the British Procurement Bill was pending; France aimed at a social consideration in 30 % of contracts against 12.5 % in 2019; and Japan's preference for social entrepreneurs was a study.
- Work integration was strongest in France, whose Finance Act for 2022 set EUR 1.3 billion for it, and in the United States, which ended subminimum wages on new and renewed AbilityOne contracts from 19 October; the skills of social entrepreneurs received measures only in Korea's lead universities.
- Culture was a thin domain: Korea held ceremonies and awards; elsewhere it was mostly statements. Policy was made amid change: Korea's new government held its first certification round in June, and France's Government of 4 July placed its Secretary of State for the SSE with the Prime Minister. Governments reported outputs rather than social outcomes.

Social entrepreneurship pursues sustainable solutions to problems that markets and governments neglect, creating value that the entrepreneur cannot fully capture (Santos, 2012). It differs from commercial entrepreneurship in the measurement of performance and in the way it

mobilises people and money (Austin, Stevenson, & Wei-Skillern, 2006), and social enterprises combine social and commercial logics whose tensions shape their mission, their finance and their staff (Doherty, Haugh, & Lyon, 2014). The state therefore plays a larger part — as legislator of legal forms, funder, purchaser and source of legitimacy. Evidence from 26 countries finds social entrepreneurship more likely where government activism is higher (Stephan, Uhlaner, & Stride, 2015), and the forms it takes vary with the national context in which it emerges (Kerlin, 2010). This report applies the domains of the entrepreneurial ecosystem to the social entrepreneurship policy of Korea, Japan, China, the United Kingdom, the United States, France and Germany in one year. It asks three questions:

1. What policies did each of these governments set out in each domain of social entrepreneurship in 2022?
2. How did the policies arise and how were they justified, how far were they valid in theory, and what had they achieved in practice by the end of the year?
3. What were their limitations, and what follows for policy?

The report draws on the policy studies and social entrepreneurship literature where it bears on a policy — on problem definition and representation (Bacchi, 2009; Rochefort & Cobb, 1993), policy transfer (Dolowitz & Marsh, 2000), non-profit enterprise and its governance (Ebrahim, Battilana, & Mair, 2014; Hansmann, 1980), the legitimacy of social entrepreneurship (Nicholls, 2010), impact investing and social impact bonds (Barber, Morse, & Yasuda, 2021; Fraser, Tan, Lagarde, & Mays, 2018), social procurement (Erridge, 2007; Loosemore, 2016), work integration (Garrow & Hasenfeld, 2014), target populations (Schneider & Ingram, 1993) and performance measurement (Behn, 2003).

Section 2 reviews and assesses the key policies of 2022 in six domains; Section 3 analyses them in context, against theory and in practice; Section 4 sets out their debates and theoretical limitations, and Section 5 their implications.

The report rests on the plans, laws, budgets, reports and announcements in which these governments set out their social entrepreneurship policy in 2022 — cabinet plans, acts, bills and committee reports, budgets, rules, notices, decrees and orders, answers to parliaments and press releases — with notes of France's Court of Audit and releases of the Japan Finance Corporation. Table 1 lists the sources by country. Quotations from sources that are not in English are IFEED's translations.

2 REVIEW OF SOCIAL ENTREPRENEURSHIP POLICIES

This section reviews the key policies of 2022 in six domains, adapted from Isenberg's domains of the entrepreneurial ecosystem (Isenberg, 2011): regulation and law; finance, in grants, funding and financial infrastructure; culture; institutional support; human capital, in education and training and in labour; and markets, in market and industry support, initial public offerings (IPO) and exit.

2.1 REGULATION AND LAW

No government created a legal form for social enterprise in 2022; regulation turned on certification, cooperatives, dormant money and programme statuses, and most changes were announced, studied or pending.

2.1.1 KOREA: SOCIAL ENTERPRISE CERTIFICATION, THE SOCIAL VALUE INDEX AND THE CERTIFICATION REGULATION IMPROVEMENT PLAN

Certification under the Social Enterprise Promotion Act continued: MOEL certified 428 social enterprises in 2022, and 3,534 were active in December (MOEL, 21 December 2022, p. 1). MOEL decided on 15 September to use the Social Value Index (SVI), from the next review, to judge the social purpose of the creative and innovative type, whose results are hard to count (MOEL, 15 September 2022, p. 1). On 16 December the Regulatory Reform Committee confirmed a plan that would abolish social enterprise certification, citing excessive requirements, and turn it into a registration system based on review of papers (MOTIE, 21 December 2022, pp. 1–2); no bill or decree followed by the end of the year. A bill on community-based economic and social services in rural areas was heard in the National Assembly on 16 November and remained pending (MAFRA, 17 November 2022, p. 1).

This was a mixed policy. The SVI route opens certification to enterprises whose value lies outside job counts. But registration was announced without a bill and would keep a status while dropping much of the screening, although legal status alone does only part of the work of keeping a hybrid to its mission (Ebrahim et al., 2014); the rural bill was pending.

2.1.2 JAPAN: THE WORKERS' COOPERATIVES ACT AND THE REVIEW OF THE DORMANT DEPOSITS ACT

The Workers' Cooperatives Act took effect on 1 October, creating a form in which members invest, have their views reflected and work (National Diet of Japan, 1 October 2022, Art. 3, and text in force from 1 October). A cooperative may not be run for profit, and one whose articles bar dividends and send residual assets to public bodies may be certified as a specified workers' cooperative (National Diet of Japan, 1 October 2022, Arts. 3, 94-2). A new corporate form for private bodies with public roles (Cabinet Office of Japan, 7 June 2022, p. 12; Cabinet Secretariat of Japan, 7 June 2022, p. 25) and a certification for impact start-ups (Cabinet Secretariat of Japan, 28 November 2022, p. 19) were only to be studied. The Cabinet Office's review policy of 16 December proposed amending the Dormant Deposits Act to name the training of social-sector actors in its purpose and to create activity-support organisations (Cabinet Office of Japan, 16 December 2022, p. 9), and an expert

panel's interim report of 26 December proposed a medium-term balance of income and costs for public-interest corporations (Cabinet Office of Japan, 26 December 2022, p. 3). No bill followed in 2022.

This was a mixed policy. The new cooperative form is in force, and its non-profit rule and the dividend ban of the specified type are the non-distribution constraint that, on Hansmann's argument, gives others grounds to trust a non-profit enterprise (Hansmann, 1980). But the form for social enterprises, the certification and the reforms of dormant deposits and public-interest corporations were studies or proposals.

2.1.3 CHINA: THE CHARITY LAW REVISION AND THE FINANCIAL RULES FOR FARMERS' COOPERATIVES

No law, certification or tax status for social enterprises appears in the work report or the State Council's legislative plan, which planned a social assistance law (General Office of the State Council, 5 July 2022, item 6; State Council of the People's Republic of China, 5 March 2022, work report). The Charity Law, a preparatory item in the NPC Standing Committee's plan of 11 April (Standing Committee of the National People's Congress, 11 April 2022, Part II(3)), was on the agenda of its session of 27 to 30 December as a draft revision (National People's Congress, 26 December 2022, para. 2); the outcome is not shown in the sources. Financial rules for farmers' professional cooperatives, issued on 8 July, will take effect on 1 January 2023, with an account for each member and at least 60 % of distributable surplus returned in proportion to members' trade (MOF & MARA, 8 July 2022, rules, Arts. 8, 35, 47). The MOF barred the use of purchase of services for disguised borrowing or employment (MOF, 25 March 2022, Part II(4)), and applicants for the central grant to social organisations had to set up a Party organisation where conditions allowed (General Office of the Ministry of Civil Affairs, 24 April 2022, plan, Part IV(1)).

This was a mixed policy. Rules on purchase of services are in force, and the cooperative rules will tie surplus to members' trade rather than to capital. But the Charity Law revision was pending, the cooperative rules take effect only in 2023, the Party condition puts social organisations under political direction, and trading social enterprises gained no status.

2.1.4 UNITED KINGDOM: THE DORMANT ASSETS ACT 2022

The Dormant Assets Act 2022, given Royal Assent on 24 February, provides for widening the scheme from bank and building society accounts to insurance, pension, investment and securities assets, and lets the Secretary of State restrict by order the causes for which English money may be spent, after a consultation that must ask about young people, money management, social investment wholesalers and community wealth funds; its main provisions come into force on days appointed by regulations (Parliament of the United Kingdom, 24 February 2022, long title, ss. 29, 34). The consultation ran from 15 July to 9 October, and no order had been made by the end of the year (DCMS, 15 July 2022, consultation page). The regime of community interest companies (CIC), 26,065 on the register in March, was unchanged (Office of the Regulator of Community Interest Companies, 5 August 2022, p. 26).

This was a mixed policy. Once commenced, the Act will enlarge a source of social investment outside the annual budget, with Parliament's approval for the causes. But the causes were undecided at the end of the year, and the legal forms of social enterprise were untouched, so the law did nothing for the governance on which, Ebrahim et al. argue, preventing mission drift mainly depends (Ebrahim et al., 2014).

2.1.5 UNITED STATES: THE CDFI CERTIFICATION REVISION, THE COMMUNITY REINVESTMENT ACT PROPOSAL AND ELECTIVE PAYMENT

No federal instrument defines social enterprise; access runs through statuses such as the certified community development financial institution (CDFI), a gateway to federal programmes (CDFI Fund, 2022, p. 11). On 4 October the CDFI Fund previewed stricter certification tests of primary mission, target market and accountability, stopped taking applications and warned that some CDFIs might no longer qualify (CDFI Fund, 4 October 2022, advance look). The bank regulators proposed on 3 June that activities with certified CDFIs count for Community Reinvestment Act (CRA) credit (Federal Reserve Board, FDIC, & OCC, 3 June 2022, 87 FR 33908); no final rule followed. The Inflation Reduction Act of 16 August will let organisations exempt from federal tax elect direct payment of clean energy credits for taxable years beginning after 31 December 2022 (United States Congress, 16 August 2022, sec. 13801), and the Treasury proposed to make the New Markets Tax Credit (NMTC) permanent (U.S. Department of the Treasury, March 2022, p. 25).

This was a mixed policy. Elective payment is enacted for tax years from 2023, and tighter certification ties a valuable status to current accountability, which legal status alone does not provide (Ebrahim et al., 2014). But the certification revision and the CRA rule were proposals, the permanent credit was not enacted, and social enterprises gained no federal status.

2.1.6 FRANCE: THE DECREE ON THE HIGHER COUNCIL OF THE SSE, THE ESUS APPROVAL AND ARTICLE 185 OF THE FINANCE ACT FOR 2023

The framework law of 31 July 2014 on the social and solidarity economy (SSE) remained the legal basis of the sector (National Assembly of France, 5 October 2022, p. 5), and the Assembly's rapporteur counted 1,707 enterprises approved as solidarity enterprises of social utility (ESUS) (National Assembly of France, 5 October 2022, p. 13). The Government's roadmap of 31 August announced an evaluation of existing tools and the simplification and modernisation of the ESUS approval (Prime Minister of France, 31 August 2022, p. 35), and the bill for 2023 provided part of EUR 0.09 million of operating credits for putting the approval online (Government of France, 2022, p. 162). Decree 2022-576 of 19 April recomposed the Higher Council of the SSE with 70 members and gave the minister in charge of the SSE the roles of the former interministerial delegate (Prime Minister of France, 19 April 2022, Arts. 1, 3). Article 185 of the Finance Act for 2023 of 30 December requires the Government to report to Parliament by 30 June 2023 on public spending for the SSE, including the difficulty of financing by tenders and calls for projects rather than operating grants (Parliament of France, 30 December 2022, Art. 185). No text of 2022 reformed the ESUS approval.

This was a mixed policy. The recomposed council gives the sector's bodies a seat beside the administration, and the report will make public spending on the SSE visible. But the simplification of the approval, the one status that marks social enterprises in French law, was announced and not drafted, the report will come only in 2023, and the framework law was unchanged.

2.1.7 GERMANY: THE PLEDGES OF THE ANNUAL ECONOMIC REPORT ON COMMON-GOOD-ORIENTED BUSINESS

The Annual Economic Report of 26 January pledged to improve the legal framework for common-good-oriented business such as cooperatives, social enterprises and integration enterprises, to create a legal basis for companies with tied assets without tax-saving constructions, and to make dormant account balances usable for the common good (Federal Government of Germany, 26 January 2022, para. 154). Asked in June what changes were planned and when, the Federal Government said that no statement could yet be made, including on cooperative law (Federal Government of Germany, 24 June 2022, p. 2). The Start-up Strategy of July committed it to examine whether common-good-oriented enterprises are disadvantaged in advice, funding or regulation (Federal Government of Germany, 28 July 2022, p. 12), and in October it set the goal of a new non-profit housing regime (BMWSB, 12 October 2022, release).

This was a poor policy. The pledges address the legal disadvantages of common-good-oriented enterprises, but none became a bill in 2022, and the Federal Government could give no timetable. Legal form is only part of the safeguard against mission drift (Ebrahim et al., 2014), and Germany offered neither a form nor the governance rules that would go with one.

2.2 FINANCE: GRANTS, FUNDING AND FINANCIAL INFRASTRUCTURE

Finance turned on funds of funds, dormant money, public and community development lenders and budget lines; tax reliefs for social investment were small or absent.

2.2.1 KOREA: THE SOCIAL ENTERPRISE FUND OF FUNDS AND THE GROWTH-FOCUS PROGRAMME

The seventh social enterprise investment partnership of KRW 6.0 billion began investing in January (MOEL, 2 June 2022, release of 17 January, p. 1), and the eighth, of KRW 6.0 billion with KRW 1.5 billion of private money, was formed on 29 April, at least 60 % for social enterprises, village enterprises, self-sufficiency enterprises and pre-social enterprises (MOEL, 2 June 2022, pp. 1–2). Eight partnerships had raised KRW 46.8 billion since 2011 (MOEL, 2 June 2022, p. 1). MSS raised its growth-focus programme from KRW 1.9 billion for 17 firms in 2021 to KRW 3.2 billion for 30 firms in 2022, with up to KRW 300 million for each firm on its scale-up track (MSS, 17 April 2022, p. 1). The summaries of MOEL's budget for 2023 do not show its social enterprise lines (MOEL, 30 August 2022).

This was a good policy. Partnerships that must invest in social enterprises draw private money into equity, and the growth-focus programme gives larger sums to firms with a record, easing the constraints of money that set social entrepreneurs apart (Austin et al., 2006). Its limit is scale.

2.2.2 JAPAN: DORMANT DEPOSIT GRANTS AND SOCIAL BUSINESS LOANS

The basic plan for dormant deposits for fiscal year 2022 set the general grant window at up to JPY 4.0 billion, paid only to fund-distributing bodies, and on 27 April turned the window for the pandemic into one for the pandemic and price rises (Prime Minister of Japan, 24 February 2022, pp. 1–3). The review policy of 16 December proposed total equity of about JPY 0.5 billion to JPY 1.0 billion, which needs an amendment of the Act (Cabinet Office of Japan, 16 December 2022, p. 11). The JFC made 12,465 social business loans worth JPY 113.7 billion in fiscal year 2021, 82.9 % and 61.6 % of the previous year; loans to businesses solving social issues rose to 4,678 (835.4 %), while those to NPO corporations fell to 821 (45.5 %) (JFC, 30 May 2022, release of 30 May, p. 1). In the first half of fiscal year 2022, a half-year not comparable with the full year, it made 8,134 loans worth JPY 70.4 billion, 127.4 % and 118.7 % of the same period a year earlier, with 4,191 loans to businesses solving social issues (173.2 %) and 333 to NPO corporations (74.2 %) (JFC, 30 May 2022, release of 29 November, p. 1). The FSA issued indicators of the social effects of social bonds (FSA, 2022, p. 1).

This was a mixed policy. Dormant money and a public lender that lent more in the first half of fiscal year 2022 ease the constraints of money that set social entrepreneurs apart (Austin et al., 2006). But the equity that would give them patient capital was a proposal, and lending to NPO corporations kept falling.

2.2.3 CHINA: THE LOTTERY PUBLIC WELFARE FUND, THE CENTRAL GRANT TO SOCIAL ORGANISATIONS AND THE ELDERCARE RELIEF

The MOF allocated CNY 5.673 billion of the central lottery public welfare fund to 32 provincial-level recipients for local public-interest undertakings such as grass-roots eldercare (MOF, 23 March 2022, notice, and annexes 1–2). The MCA's central grant funded social organisations by competition, up to CNY 800,000 a project in its largest class, but excluded investment and cash relief (General Office of the Ministry of Civil Affairs, 24 April 2022, plan, Parts II–III). Eldercare and childcare providers that are small firms or individual businesses renting state premises received rent waivers to the end of 2022, qualifying providers a reduction of up to 50 % of six taxes and two fees, and a pilot of refinancing loans for inclusive eldercare (NDRC et al., 29 August 2022, measures 1, 4, 11), and social organisations renting public premises were to receive rent reductions (MCA, MOE, & MOHRSS, 8 July 2022, Part II(3)).

This was a mixed policy. Lottery money, grants and relief reach services and providers at the margin of the market. But the grants buy services rather than build enterprises, the relief is for eldercare and childcare, and no instrument prices the value that social entrepreneurs create but cannot capture (Santos, 2012).

2.2.4 UNITED KINGDOM: DORMANT ASSETS ALLOCATIONS, SOCIAL INVESTMENT TAX RELIEF AND THE COMMUNITY OWNERSHIP FUND

DCMS allocated GBP 44 million of English dormant assets on 8 February: GBP 20 million to Access for finance for up to 1,000 charities and social enterprises, GBP 20 million to Youth Futures Foundation and GBP 4 million to Fair4All Finance (DCMS, 8 February 2022, release of 8 February). It

expected the Act to release a further GBP 880 million (DCMS, 8 February 2022, release of 24 February) and consulted on the causes for about GBP 738 million of it in England (DCMS, 15 July 2022, release). Under Social Investment Tax Relief (SITR) 35 social enterprises raised GBP 3.7 million in 2020–21, against GBP 3 million in 2019–20 (HMRC, 5 May 2022, section 1.3). The GBP 150 million Community Ownership Fund opened its second round on 27 May with wider eligibility (DLUHC, 27 May 2022, release of 27 May). The Growth Plan's energy relief covered all non-domestic users, charities included, with nothing specific to social enterprises, and the Autumn Statement had no measure for the field (HM Treasury, 17 November 2022, Growth Plan, para. 2.6, and Autumn Statement).

This was a mixed policy. Dormant money allocated to a social investment intermediary and a fund for community assets add patient capital outside the annual budget. But most of the new dormant money had no causes at the end of the year, and the one relief for investors in social enterprises raised little, if slightly more than a year earlier, although investors other than those with a mission need such incentives to accept lower returns for impact (Barber et al., 2021).

2.2.5 UNITED STATES: CDFI FUND APPROPRIATIONS AND AWARDS, THE NEW MARKETS TAX CREDIT AND THE EMERGENCY CAPITAL INVESTMENT PROGRAM

Congress appropriated USD 295 million for the CDFI Fund for fiscal year 2022 (United States Congress, 15 March 2022, 136 Stat. 242) and USD 324 million for fiscal year 2023 on 29 December (United States Congress, 29 December 2022, 136 Stat. 4653), against a request of USD 331.42 million (CDFI Fund, 2022, p. 4). The Fund allocated more than USD 5 billion of NMTC authority to 107 community development entities (CDE) on 28 October (CDFI Fund, 28 October 2022, release) and awarded USD 336.4 million from the Capital Magnet Fund (CDFI Fund, 22 June 2022, release of 22 June); its Equitable Recovery Program offered up to USD 1.73 billion to certified CDFIs (CDFI Fund, 24 June 2022, 87 FR 37913), and the Treasury invested over USD 8.28 billion in 162 community financial institutions (U.S. Department of the Treasury, 21 September 2022, release). The Inflation Reduction Act created a Greenhouse Gas Reduction Fund of about USD 27 billion for non-profit lenders and others (United States Congress, 16 August 2022, sec. 60103).

This was a good policy. Appropriations, tax credits, awards and capital reached lenders that serve communities mainstream finance neglects, and because investors accept lower returns for impact mainly where they have a mission or face political pressure (Barber et al., 2021), credits that raise private returns draw others in. The lenders must meet a primary community development mission; the limit is that recovery awards and clean energy grants were still to be made.

2.2.6 FRANCE: ACTION 04 OF PROGRAMME 305 AND IMPACT CONTRACTS

The Finance Act for 2022 gave action 04, the State's budget line for the SSE, EUR 19.20 million of commitments, and the bill for 2023 provided EUR 19.22 million of commitments and EUR 20.69 million of payments (Government of France, 2022, p. 161), a rise of 0.093 % and 7.50 % (National Assembly of France, 5 October 2022, p. 8); the Finance Act for 2023 was enacted on 30 December, but its text in the sources does not show the line (Parliament of France, 30 December 2022, Art. 185). In the bill, commitments for developing the SSE fell from EUR 7.3 million to EUR 5.54

million, while support to SSE structures rose from EUR 3.25 million to EUR 5.09 million (National Assembly of France, 5 October 2022, pp. 9, 11). The bill kept EUR 1.7 million of payments for social impact investment, and the rapporteur reported EUR 3.5 million unspent on impact contracts that were hard to structure (Government of France, 2022, p. 163; National Assembly of France, 5 October 2022, p. 10).

This was a mixed policy. The State kept its SSE line in 2022 and proposed to keep it for 2023, with more for SSE structures. But the line is small, its development part fell in the bill, the amounts for 2023 are shown only as the bill's, and impact contracts left money unspent, which accords with the review that finds limited evidence for social impact bonds (Fraser et al., 2018).

2.2.7 GERMANY: THE REACT WITH IMPACT PROGRAMME AND THE KFW LOANS FOR COOPERATIVE SHARES

In June the Federal Government announced for 2022 a funding programme, REACT with impact, for common-good-oriented enterprises (Federal Government of Germany, 24 June 2022, p. 3), but by October nothing had been spent on its title, against EUR 9 million expected for the year (Federal Government of Germany, 15 November 2022, p. 4). The draft budget for 2023 set a title for common-good-oriented SMEs at EUR 26.108 million, its programme money financed in full from the EU recovery instrument and its implementation costs about 55 % from EU funds, to be pre-financed from the budget (Federal Government of Germany, 5 August 2022, Einzelplan 09, pp. 55–56), and the Budget Committee rejected an opposition motion to delete it (Budget Committee of the German Bundestag, 18 November 2022, p. 33). The Start-up Strategy promised financing instruments for common-good-oriented start-ups (Federal Government of Germany, 28 July 2022, p. 12). On 4 October the BMWSB and KfW launched loans of up to EUR 100,000 for private persons to buy shares in housing cooperatives, with 15 % of the loan waived, and a budget of EUR 6 million for 2022 (BMWSB, 4 October 2022, release).

This was a mixed policy. Cooperative share loans began, and a dedicated title reached the draft budget. But the programme announced for 2022 had not started, its money for 2023 was a draft that depends on EU reimbursement, and the one launched instrument served members of housing cooperatives; the government activism with which social entrepreneurship is more likely (Stephan et al., 2015) was mostly announced.

2.3 CULTURE

Culture was a thin domain: Korea held ceremonies and awards; elsewhere it was mostly outreach and statements.

2.3.1 KOREA: SOCIAL ENTERPRISE DAY, THE BEST COOPERATIVE AWARDS AND THE SOCIAL VENTURE CONTEST

For the 15th anniversary of the Social Enterprise Promotion Act, MOEL held an events week and a ceremony on 8 July, with seven government honours, 10 ministerial commendations and 13 awards to local governments (MOEL, 8 July 2022, pp. 1–2). On the 10th anniversary of the Framework Act on Cooperatives, MOEF gave seven awards to cooperatives and KoSEA 14 more (MOEF, 9 July 2022,

p. 1), and MOEL's Social Venture Contest drew 615 teams and made 39 awards on 23 November (MOEL, 21 December 2022, release of 23 November, p. 1).

This was a good policy. State honours, awards for cooperatives and a contest for social ventures give social entrepreneurs formal recognition and a national stage. Its limit is that recognition of this kind, as Nicholls argues of the field's dominant discourses, tends to legitimate the actors who already hold resources (Nicholls, 2010), and no measure of public awareness was reported.

2.3.2 JAPAN: THE FORUMS ON WORKER COOPERATIVES AND THE BASIC POLICY'S PLEDGE TO SOCIAL ENTREPRENEURS

MHLW opened a website and held forums at seven places from September to explain the new worker cooperatives (MHLW, 3 October 2022, release). The Basic Policy of 7 June promised support for social entrepreneurs through a culture of giving and venture philanthropy (Cabinet Office of Japan, 7 June 2022, p. 12), and the grand design said their activity would be supported in full (Cabinet Secretariat of Japan, 7 June 2022, p. 3).

This was a mixed policy. The forums spread knowledge of a new form that people can use to found enterprises. But the support for social entrepreneurs was a statement of aim without a programme, and the language of growth defines social entrepreneurs by scale rather than by the neglected problems they solve (Santos, 2012).

2.3.3 CHINA: EVALUATION GRADES OF SOCIAL ORGANISATIONS AND CIVILISED PRACTICE

The MCA's General Office standardised the plaques of the evaluation grades of social organisations, which it called an important basis for preferential policies, and barred fees for them (General Office of the Ministry of Civil Affairs, 26 December 2022, opening paragraph, and Part IV). A joint notice of the MCA and a Party office made the study of the 20th Party Congress the main line of community social organisations' participation in civilised practice, with volunteer service as its main form (MCA & Office of the Central Steering Commission for Building Spiritual Civilisation, 6 August 2022, Part I). Social organisations with outstanding employment results were to be commended (MCA, MOE, & MOHRSS, 8 July 2022, Part III(2)), and state-owned firms must report their disability quota in their social responsibility reports (General Office of the State Council, 25 March 2022, Part II(3)).

This was a mixed policy. Grades and commendations give social organisations a recognised standing that carries consequences. But the grades and commendations went to social organisations, not to enterprises that trade for social aims, and recognition was organised under Party and State direction.

2.3.4 UNITED KINGDOM: THE SOCIAL ECONOMY IN THE LEVELLING UP WHITE PAPER AND THE OUTREACH OF THE CIC REGULATOR

The white paper of 2 February said the government would consider how best to encourage social organisations and entrepreneurship in left-behind places and the next generation of social

entrepreneurs, without a programme or budget (DLUHC, 2 February 2022, p. 216). The CIC Regulator ran webinars with Companies House and the Charity Commission on the differences between CICs and charities (Office of the Regulator of Community Interest Companies, 5 August 2022, p. 4). A study for DCMS and BEIS published in August estimated 131,000 social enterprises with employees in 2019, 9.5 % of SME employers (DCMS & BEIS, 31 August 2022, p. 5).

This was a mixed policy. The regulator's outreach helps founders choose a form, and the estimate published by DCMS gives the sector visibility. But the white paper only promised to consider the social economy, and the government offered no award, label or campaign for social enterprise.

2.3.5 UNITED STATES: PROCLAMATIONS ON NATIONAL VOLUNTEER WEEK AND DISABILITY EMPLOYMENT

Proclamation 10370 of 15 April credited AmeriCorps with removing barriers to service and cast government as one partner among non-profits, community organisations and the private sector (President of the United States, 15 April 2022, 87 FR 23749), and Proclamation 10460 of 30 September pointed to funding for non-profits that hire people with disabilities (President of the United States, 15 April 2022, Proclamation 10460, 87 FR 60251).

This was a poor policy. The proclamations recognise volunteering and the hiring of disabled workers by non-profits, but they are statements without instruments, and no award, label or campaign for enterprises that pursue social aims followed in 2022.

2.3.6 FRANCE: THE ROADMAP FOR THE SSE AND THE SSE STRAND OF THE PRESIDENCY OF THE COUNCIL OF THE EU

Decree 2022-1059 charged the Secretary of State with promoting the SSE and encouraging social, solidarity and sustainable consumption (Prime Minister of France, 29 July 2022, Art. 1), and the Government's roadmap of 31 August aimed to make the principles of the SSE and volunteering shine and to value companies' commitment through the responsible economy, foundations and sponsorship (Prime Minister of France, 31 August 2022, p. 35). The programme of France's presidency of the Council of the European Union (EU) in the first half of 2022 included an SSE strand, and the bill for 2023 provided EUR 0.135 million, against EUR 0.3 million, for the SSE's European and international development (National Assembly of France, 5 October 2022, p. 11). The national plan for sustainable purchasing continued an annual national trophy and planned an ambassador for sustainable purchasing (Ministry of Ecological Transition, 2022, p. 23).

This was a mixed policy. A ministerial duty to promote the SSE is in force, and the presidency gave the sector a European platform for six months. But the roadmap's aims were announced without measures, the ambassador was planned, the trophy rewards purchasing practice rather than social enterprise, and the bill more than halved the line for promoting the SSE abroad.

2.3.7 GERMANY: SOCIAL ENTERPRISES IN THE ANNUAL ECONOMIC REPORT AND THE START-UP STRATEGY

The Annual Economic Report described social enterprises, cooperatives, social entrepreneurs and companies with tied assets as part of a modern corporate culture (Federal Government of Germany, 26 January 2022, para. 153), the Start-up Strategy called common-good-oriented enterprises a driver of social innovation (Federal Government of Germany, 28 July 2022, p. 12), and BMBF called social innovations the twin of technological ones (BMBF, 27 April 2022, press release 33/2022).

This was a poor policy. The statements give common-good-oriented enterprises a place in the government's vocabulary, but no award, campaign or other measure followed in 2022.

2.4 SUPPORT: INSTITUTIONAL SUPPORT

Support turned on the intermediaries that designate, measure, advise and connect social enterprises, and on the bodies responsible for them.

2.4.1 KOREA: PRE-SOCIAL ENTERPRISE DESIGNATION, SOCIAL VALUE MEASUREMENT AND THE GWANGJU INNOVATION TOWN

Ministries designated pre-social enterprises eligible for MOEL support: MCST designated 51 of 137 applicants for three years from 23 December (MCST, 23 December 2022, pp. 1–2), the Korea Forest Service opened its second call on 24 June (Korea Forest Service, 24 June 2022, p. 1) and MOHW called for health and welfare firms, which local governments may support with up to KRW 100 million a year for business development (MOHW, 24 November 2022, release of 3 July, p. 1). MSS opened a free social value measurement service for social ventures on 1 November (MSS, 17 February 2022, release of 31 October, p. 1), and MOEL used the SVI to link social enterprises to consulting (MOEL, 15 September 2022, annex 1). MOTIE chose Gwangju on 30 March for a seventh social economy innovation town, to be built (MOTIE, 8 April 2022, p. 1), and MOHW's pilot in 12 local governments ended in December (MOHW, 24 November 2022, p. 1, and release of 19 December, p. 2).

This was a mixed policy. Designation by sector ministries and free measurement of social value build capacity and give social enterprises a way to show the performance that sets them apart (Austin et al., 2006). But the innovation town was a decision to build, and the social services pilot ended with no successor announced.

2.4.2 JAPAN: THE JFC SOCIAL BUSINESS SUPPORT NETWORK AND THE ACCOMPANYING SUPPORT OF DORMANT DEPOSITS

The JFC's social business support network of local governments, banks and NPO support bodies had 110 members in March and 109 in September (JFC, 30 May 2022, release of 30 May, p. 2, and release of 29 November, p. 1). The review of dormant deposits found accompanying, non-financial support the notable achievement of the scheme's first years and proposed activity-support organisations to provide it (Cabinet Office of Japan, 16 December 2022, pp. 2, 9), but on 13

December the council had not settled their model (Cabinet Office of Japan, 16 December 2022, council paper, p. 3). The economic package of 28 October proposed a subsidy to private bodies that help people in need and for work on loneliness and isolation (Government of Japan, 28 October 2022, p. 37).

This was a mixed policy. A lender's local networks and grants with accompanying support build the connections and capacity that hybrid organisations need to raise money and staff (Doherty et al., 2014). But the network did not grow, the support organisations were unsettled, and the package's proposed help would go to bodies that work on isolation rather than to social enterprises.

2.4.3 CHINA: INCUBATION BASES, PAIRING WITH KEY COUNTIES AND THE MCA'S LEAD ON SOCIAL ORGANISATIONS

The State Council assigned to the MCA the task of supporting the healthy development of social organisations, charity and volunteer service, to be advanced through the year (State Council of the People's Republic of China, 5 March 2022, opinion of 21 March, task 44). A joint notice asked governments to promote bases for incubating and training social organisations (MCA, MOE, & MOHRSS, 8 July 2022, Part II(5)), and another paired national and provincial social organisations with key counties for rural revitalisation, with a project bank and an online matching platform (MCA & NRRA, 15 February 2022, Parts IV, VI). Social assistance was to gain liaison officers in every village and more purchase of assistance services (MCA, Office of the Central Rural Work Leading Group, MOF, & NRRA, 20 October 2022, Part V(4)).

This was a mixed policy. Incubation, pairing and paid services give social organisations defined roles and demand. But support was organised as direction from above, which fits Kerlin's argument that national context shapes the forms social enterprise takes (Kerlin, 2010), and nothing in it addressed enterprises that trade for social aims.

2.4.4 UNITED KINGDOM: THE VCSE CONTRACT READINESS FUND

DCMS invited bids on 1 September to co-design and deliver a programme of up to GBP 900,000 over three financial years from 2022–23 to help voluntary, community and social enterprise (VCSE) organisations with turnover of GBP 250,000 to GBP 10 million compete for public contracts, mainly in central government supply chains, by improving their bidding skills and their knowledge of tenders (DCMS, 1 September 2022, pp. 2–4). Applications closed on 29 September; no choice of delivery partner was reported in 2022.

This was a good policy. Help to bid for contracts addresses the tendering burdens that the leaders of social enterprises interviewed by Loosemore identified as barriers (Loosemore, 2016). Its limits are scale, and that no delivery partner had been reported chosen by the end of the year.

2.4.5 UNITED STATES: RURAL COOPERATIVE DEVELOPMENT GRANTS AND THE ECONOMIC MOBILITY CORPS

USDA invited applications on 6 April for rural cooperative development grants of up to USD 200,000 to non-profit corporations and universities, and on 14 April for grants of up to

USD 175,000 through cooperatives and centres whose boards are mostly from socially disadvantaged groups (USDA, 6 April 2022, 87 FR 19842, 22171–22172). The appropriations acts set aside USD 2 million of the CDFI line for the Economic Mobility Corps, which places national service members in CDFIs, and up to USD 10 million for CDFIs that expand investment benefiting people with disabilities (United States Congress, 15 March 2022, 136 Stat. 243; United States Congress, 29 December 2022, 136 Stat. 4654).

This was a good policy. Grants through cooperative centres, a governance test that puts disadvantaged groups on boards and national service in community lenders build the institutions through which social enterprises are started. Its limit is scale, at most USD 200,000 a grant.

2.4.6 FRANCE: THE LOCAL SUPPORT SCHEME, THE TERRITORIAL COOPERATION HUBS AND THE SECRETARIAT OF STATE FOR THE SSE

The local support scheme (DLA), co-financed by the State, advises about 6,000 SSE structures a year, and the bill for 2023 provided EUR 11.45 million for it (Government of France, 2022, p. 162). The bill created a sub-action for territorial economic cooperation hubs (PTCE) with EUR 2.23 million, to fund 15 new hubs with EUR 100,000 each (Government of France, 2022, p. 163), which the rapporteur noted was money moved from another sub-action; a line of territorial support for social innovation had disappeared since the bill for 2022 (National Assembly of France, 5 October 2022, p. 12). The decree of 4 July named a Secretary of State for the SSE and associative life (President of the French Republic, 4 July 2022, Art. 1), placed with the Prime Minister and given the Treasury for SSE matters by Decree 2022-1059 of 29 July (Prime Minister of France, 29 July 2022, Arts. 1–2), and the roadmap promised to simplify the life of associations (Prime Minister of France, 31 August 2022, p. 35).

This was a mixed policy. A funded advice scheme and a member of the Government attached to the Prime Minister give the sector capacity and a voice. But the hubs' money was moved from another line, not new, a line for social innovation was cut, and the roadmap's simplification was announced; France held steady the activism with which social entrepreneurship is more likely (Stephan et al., 2015).

2.4.7 GERMANY: THE BMBF COMMISSIONER FOR SOCIAL INNOVATIONS AND THE ANNOUNCED NATIONAL STRATEGY

BMBF appointed a Commissioner for Social Innovations from 1 April (BMBF, 27 April 2022, press release 26/2022), who works unpaid with a flat allowance of EUR 3,500 a month (Federal Government of Germany, 21 September 2022, p. 5). The Annual Economic Report announced a national strategy for social enterprises (Federal Government of Germany, 26 January 2022, para. 154), the Start-up Strategy said the government would adopt its own strategy on social entrepreneurship and fund incubators and accelerators for common-good-oriented start-ups (Federal Government of Germany, 28 July 2022, pp. 12–13), and BMBF was drafting a strategy on social innovations with the other federal ministries (BMBF, 27 April 2022, press release 33/2022). Neither strategy was adopted in 2022.

This was a mixed policy. A commissioner gives social innovation a point of contact in government. But the strategies and the incubator funding remained promises, so the support that accompanies social entrepreneurship where governments are active (Stephan et al., 2015) was not in place.

2.5 HUMAN CAPITAL: EDUCATION AND TRAINING, AND LABOUR

Human capital turned on work integration; the skills of social entrepreneurs received little attention.

2.5.1 KOREA: LEAD UNIVERSITIES FOR THE SOCIAL ECONOMY

MOEL and KoSEA selected four lead universities for 2022, two with undergraduate courses and two with courses for working managers, to train about 200 people a year; the programme had produced 1,332 graduates since 2013, and MOEL planned a new education model and more routes for students into social economy firms (MOEL, 20 February 2022, pp. 1–2). Certified social enterprises employed 66,917 workers in December, 40,583 of them, or 60.6 %, from vulnerable groups (MOEL, 21 December 2022, annex).

This was a mixed policy. Courses for managers and students build the skills that hybrid organisations need when they must mobilise staff for both social and commercial ends (Doherty et al., 2014). But they reach about 200 people a year, and the new education model was a plan.

2.5.2 JAPAN: WORKER COOPERATIVES AND EDUCATION FOR SOCIAL ENTREPRENEURS

MHLW presented worker cooperatives as a way to create work in care, disability welfare, child-raising and community building in areas whose population is falling (MHLW, 3 October 2022, release). The Basic Policy and the grand design said that the system for fostering social entrepreneurs through entrepreneurship education would be considered for strengthening (Cabinet Office of Japan, 7 June 2022, p. 12; Cabinet Secretariat of Japan, 7 June 2022, p. 25), and the start-up plan proposed university programmes and bases for impact start-ups and sending young aspirants abroad (Cabinet Secretariat of Japan, 28 November 2022, p. 19).

This was a mixed policy. Worker cooperatives, in force from October, let people create their own jobs. But the education measures were to be considered or planned, and the mobilisation of staff, one of the distinctive tensions of hybrid organisations (Doherty et al., 2014), received no measure.

2.5.3 CHINA: GRADUATE EMPLOYMENT THROUGH SOCIAL ORGANISATIONS AND THE THREE-YEAR PLAN FOR DISABILITY EMPLOYMENT

A joint notice of 8 July asked governments to use purchase of services and public-interest venture projects so that social organisations create jobs and internships (MCA, MOE, & MOHRSS, 8 July 2022, Part II(1)–(2)). The three-year action plan of 25 March aimed at one million more disabled people in work, required state-owned firms that miss the quota to pay the levy in full and asked for supported employment in care and rehabilitation centres (General Office of the State Council, 25 March 2022, Parts I, II(2), II(5)). The central grant funded about 37 training projects of up to CNY 300,000 for staff of community social organisations (General Office of the Ministry of Civil

Affairs, 24 April 2022, plan, Part II(4)), and assisted households may keep their allowance for up to six months after a member finds work (MCA, Office of the Central Rural Work Leading Group, MOF, & NRRA, 20 October 2022, Part I(3)).

This was a mixed policy. Jobs in social organisations, supported employment and a work incentive treat people in need as workers rather than only as dependants, a construction of target groups that shapes what policy offers them (Schneider & Ingram, 1993). But the measures direct social organisations to absorb employment rather than build social enterprises, and the disability target is for the plan period.

2.5.4 UNITED KINGDOM: TRAINING IN SOCIAL ENTERPRISES IN THE DCMS MARKET TRENDS STUDY

No measure of 2022 addressed the skills of social entrepreneurs or of the people who work in social enterprises; the bidding skills that the Contract Readiness Fund was to build are reviewed under support (Section 2.4.4). A study for DCMS and BEIS reported that 58 % of social enterprises had undertaken training in 2018–2019, against 46 % of commercial SMEs (DCMS & BEIS, 31 August 2022, p. 6).

This was a poor policy. Limited access to skilled staff is a distinctive constraint of social enterprises (Doherty et al., 2014), and the government set out nothing for it.

2.5.5 UNITED STATES: THE ABILITYONE WAGE RULE AND THE AMERICORPS MATCH REVIEW

The AbilityOne Commission's final rule of 21 July, effective 19 October, requires non-profit agencies to pay at least the highest applicable minimum or prevailing wage, ending subminimum wages under 14(c) certificates, on new contracts and on existing ones at renewal, extension or the exercise of an option, with extensions of up to 12 months for agencies that show cause (U.S. AbilityOne Commission, 21 July 2022, 87 FR 43427, 43428); 120 of 449 agencies and about 1,200 workers, paid on average USD 5.11 an hour, were affected (U.S. AbilityOne Commission, 21 July 2022, 87 FR 43430, 43432). AmeriCorps asked on 5 May whether its match rules, rising from 24 % to 50 % over 10 years, deter applicants that serve underserved communities (AmeriCorps, 5 May 2022, 87 FR 26740).

This was a mixed policy. A wage floor in force, though reaching existing contracts only as they are renewed, treats disabled workers as workers owed the minimum wage rather than as dependants (Schneider & Ingram, 1993). But the match review was a request for information, and no measure addressed the skills of social entrepreneurs.

2.5.6 FRANCE: WORK INTEGRATION AID AND THE ZERO LONG-TERM UNEMPLOYMENT TERRITORIES

The initial Finance Act for 2022 set EUR 1,299.98 million for integration through economic activity (IAE), and the bill for 2023 provided EUR 1,316.33 million (National Assembly of France, 5 October 2022, p. 9; Senate of France, 17 November 2022, IAE table). Orders raised the State's aid per full-

time post in integration enterprises from EUR 11,087 to EUR 11,381 from 1 May and to EUR 11,609 from 1 August (Minister of Labour, Full Employment and Integration, 5 July 2022, order of 5 July, Art. 1, and order of 5 December, Art. 1); the Senate's rapporteurs reported EUR 11,923 planned for 2023, and a cut of about 10 % in subsidised contracts (Senate of France, 17 November 2022, sections on IAE and subsidised contracts). Orders from February to December empowered further territories for the zero long-term unemployment experiment, five on 21 December (Minister of Labour, Employment and Integration, 12 April 2022, orders of 10 February and 15 April; Minister of Labour, Full Employment and Integration, 21 December 2022, Art. 1, and orders of 3 June to 28 November); the rapporteurs counted 35 empowered territories, about 1,500 employees hired in 28 enterprises by July, and EUR 44.9 million proposed for 2023 against EUR 32.8 million in 2022 (Senate of France, 17 November 2022, section on the experiment). The Court of Audit found 86,885 posts filled in 2021 against 94,645 agreed and 45 % of the experiment's credits used (Court of Audit, 2022, pp. 61–62).

This was a mixed policy. France funded work integration on a large scale in 2022, raised its aid per post twice in the year and widened the experiment. But the rises for 2023 are shown only in the bill, the bill cut subsidised contracts, posts and credits went unused, and instruments that fund posts and hours risk treating workers as units of labour (Garrow & Hasenfeld, 2014).

2.5.7 GERMANY: COMMON-GOOD-ORIENTED SPIN-OFFS IN THE START-UP STRATEGY

No measure of 2022 addressed the skills of social entrepreneurs or work integration. The Start-up Strategy promised to strengthen support for common-good-oriented spin-offs from science in the federal programme for start-ups from higher education (Federal Government of Germany, 28 July 2022, p. 12), and integration enterprises appeared only in the pledge to improve their legal framework (Federal Government of Germany, 26 January 2022, para. 154).

This was a poor policy. The professional skills and impact measurement that set social entrepreneurship apart (Austin et al., 2006) received no measure, and the one item was a promise.

2.6 MARKET: MARKET AND INDUSTRY SUPPORT, IPO AND EXIT

Markets turned on public purchasing; social value in procurement was mostly promised, and exit received no attention.

2.6.1 KOREA: PRIORITY PURCHASING OF SOCIAL ENTERPRISE PRODUCTS

Under the Social Enterprise Promotion Act, 861 public institutions bought KRW 1.8171 trillion of social enterprise products in 2021, 2.77 % of their purchases, and planned KRW 2.0986 trillion, 3.29 %, for 2022; local governments bought 6.27 % and central government bodies 0.78 %, in a year in which KRW 3.2 trillion of vaccine purchases swelled the total (MOEL, 27 April 2022, pp. 1–2, 4). Public buyers took 42.7 % of social enterprises' sales in 2021 (MOEL, 21 December 2022, p. 4). MOEL announced that it would rebuild its online shop for social economy products (MOEL, 27 April 2022, p. 3).

This was a mixed policy. Purchasing on this scale gives social enterprises a market and brings social aims into public buying, which can pursue them alongside commercial goals (Erridge, 2007). But central bodies bought only 0.78 %, dependence on public buyers was high, and the online shop was a promise.

2.6.2 JAPAN: PRIORITY PROCUREMENT FROM DISABILITY WORK FACILITIES AND PAY-FOR-SUCCESS PROJECTS

The Ministry of Finance of Japan set itself to buy more from work facilities for persons with disabilities than in the previous year, using negotiated contracts (Ministry of Finance of Japan, 31 March 2022, p. 1). The Cabinet Office counted 100 pay-for-success projects at the end of fiscal year 2021 and found that about 60 % of local governments saw setting outcome indicators as a major issue (Cabinet Office of Japan, 21 July 2022, pp. 1, 3). The start-up plan listed a procurement preference for social entrepreneurs and a list of recommended firms for municipalities as items to be studied (Cabinet Secretariat of Japan, 28 November 2022, p. 19).

This was a mixed policy. Priority procurement from disability work facilities and outcome-based contracts bring social aims into public purchasing. But evidence on outcome-based contracts is limited (Fraser et al., 2018), local governments struggled to measure outcomes, and the preference was a study.

2.6.3 CHINA: GOVERNMENT PURCHASE OF SERVICES AND RESERVED POSTS FOR DISABLED PEOPLE

The MOF directed that community services suited to market delivery, including eldercare, childcare, disability assistance and employment services, be bought from social forces, and that governments no longer build public eldercare homes where purchase is suitable (MOF, 25 March 2022, Part I(1), (3)). Social organisations with outstanding employment results were to receive priority in service contracts (MCA, MOE, & MOHRSS, 8 July 2022, Part III(2)), and new community service points must reserve a share of posts for disabled people (General Office of the State Council, 25 March 2022, Part II(2)).

This was a mixed policy. Purchase of services and eldercare markets give social organisations demand, and reserved posts give disabled people access. But no rule sets a criterion for social value, so purchasing can favour the commercial goals that, Erridge argues, tend to dominate (Erridge, 2007), and no market is reserved for enterprises that employ disadvantaged workers.

2.6.4 UNITED KINGDOM: THE PROCUREMENT BILL AND THE SOCIAL VALUE MODEL

The Cabinet Office said on 12 May that the Procurement Bill would open public procurement, some GBP 300 billion a year, to small businesses and social enterprises, require buyers to consider SMEs and let them reserve competitions below thresholds for UK suppliers, SMEs and social enterprises (Cabinet Office, 12 May 2022, news story); it was pending at the end of the year. The Social Value Model had applied to central government since January 2021 (DCMS, 1 September 2022, p. 2). A study for DCMS estimated that up to 5 % of VCSEs, 9,200 to 12,500, took part in government contracting each year (DCMS, 30 August 2022, p. 4).

This was a mixed policy. Reserved competitions and a duty to consider SMEs address the contract size and tendering that exclude social enterprises (Loosemore, 2016), and the Social Value Model counters commercial goals (Erridge, 2007). But the Bill was not law, and few VCSEs took part in government contracting.

2.6.5 UNITED STATES: THE ABILITYONE PROCUREMENT LIST AND SIPPRA PAY-FOR-RESULTS AGREEMENTS

Federal agencies must buy products and services on the AbilityOne Procurement List from non-profit agencies employing people who are blind or have significant disabilities (U.S. AbilityOne Commission, 21 July 2022, 87 FR 43427), which sold USD 3.9 billion to federal buyers; the Commission prepared for a 50 % increase in purchases over several years after a memorandum of 2020 asked agencies to devote at least 1 % of contract spending to the programme (U.S. AbilityOne Commission, 25 March 2022, pp. 2, 6). Under the Social Impact Partnerships to Pay for Results Act (SIPPRA) the Treasury published agreements with New York City and Oklahoma, paying only for outcomes an independent evaluator verifies (U.S. Department of the Treasury, 24 February 2022, 87 FR 10432, 12221).

This was a good policy. A reserved market in force and payment only on evaluated results bring social aims into federal purchasing. Its limits are that growth rests on agency pledges, that the evidence on outcome-based contracts is limited (Fraser et al., 2018), and that SIPPRA covered two projects.

2.6.6 FRANCE: THE NATIONAL PLAN FOR SUSTAINABLE PURCHASING

The national plan for sustainable purchasing set the aim that 30 % of public contracts notified in a year include at least one social consideration by the end of the plan period, against 12.5 % in 2019 and a target of 25 % in the previous plan (Ministry of Ecological Transition, 2022, p. 9). Its inclusion marketplace listed 6,000 integration and adapted structures for buyers (Ministry of Ecological Transition, 2022, p. 15), and only 34 of the 160 local authorities that must adopt a scheme for socially and ecologically responsible purchasing (SPASER) had done so (Ministry of Ecological Transition, 2022, p. 20). The rapporteur warned that support to the SSE went increasingly through tenders, risking lowest-price selection (National Assembly of France, 5 October 2022, p. 31).

This was a mixed policy. A target and a marketplace of inclusive suppliers give social enterprises an opening. But the plan is not binding, the previous target was missed, most authorities ignored their duty, and social enterprises need lots and procedures they can win (Loosemore, 2016).

2.6.7 GERMANY: COMMON-GOOD-ORIENTED START-UPS IN PUBLIC PROCUREMENT

The Start-up Strategy aimed to raise the visibility of common-good-oriented start-ups in public procurement and to bring social entrepreneurs together with procurement officials (Federal Government of Germany, 28 July 2022, p. 13). No procurement rule changed in 2022.

This was a poor policy. Meetings with buyers would counter the commercial goals that dominate procurement (Erridge, 2007), but they remained a promise.

3 ANALYSIS OF THE POLICIES

3.1 CONTEXTUAL ANALYSIS: ORIGINS, BACKGROUND AND RATIONALE OF THE POLICIES

Policy in 2022 was made through new and reshaped governments. MOEL called June's certification round the first under Korea's new government and linked social enterprises to its social services task (MOEL, 8 July 2022, p. 3; MOEL, 21 December 2022, release of 21 June, p. 1); in France the decree of 4 July named a Secretary of State for the SSE, attached to the Prime Minister with the Treasury at her disposal (President of the French Republic, 4 July 2022, Art. 1; Prime Minister of France, 29 July 2022, Arts. 1–2). China's direction of social organisations took the 20th Party Congress as its main line (MCA & Office of the Central Steering Commission for Building Spiritual Civilisation, 6 August 2022, Part I).

The fiscal setting was tight: MOEL's total budget proposal for 2023 was 4.3 % below its budget for 2022 as pandemic spending ended, with no social enterprise line shown (MOEL, 30 August 2022, proposal, p. 1), France's bill held SSE commitments flat while raising payments by 7.50 % (National Assembly of France, 5 October 2022, p. 8), the Autumn Statement had nothing for the field (HM Treasury, 17 November 2022, Autumn Statement), and Germany's new title relied on EU money (Federal Government of Germany, 5 August 2022, Einzelplan 09, p. 56). The US Congress, by contrast, raised the CDFI Fund from USD 295 million to USD 324 million (United States Congress, 15 March 2022, 29 December 2022), and Japan, the United Kingdom and China financed part of their support from dormant accounts or lottery money, outside the annual budget (DCMS, 8 February 2022; MOF, 23 March 2022; Prime Minister of Japan, 24 February 2022).

The governments drew on a shared repertoire of instruments, the material of policy transfer (Dolowitz & Marsh, 2000), though their sources do not say who borrowed from whom: dormant money in Japan and the United Kingdom, pledged in Germany (Federal Government of Germany, 26 January 2022, para. 154); measures of social value (DCMS, 1 September 2022; FSA, 2022; MOEL, 15 September 2022); and outcome-based contracts (Cabinet Office of Japan, 21 July 2022; Government of France, 2022; U.S. Department of the Treasury, 24 February 2022). Kerlin (2010) argues that social enterprise takes its form from its national context, which limits transfer.

Yet each government represented the problem of social entrepreneurship in its own way, and the representation shaped the solutions it chose (Bacchi, 2009; Rochefort & Cobb, 1993)(Table 2).

Table 2: How the governments represented the problem

Country	Problem represented	Presupposition	Left unsaid
Korea	Certification whose excessive requirements burden firms (MOTIE, 21 December 2022, p. 2)	Lighter entry will let more enterprises in	How social purpose will be checked
Japan	Solving social issues as an engine of growth (Cabinet Office of Japan, 7 June 2022, p. 12)	New forms and start-up support bring growth	NPO corporations whose borrowing fell
China	Social organisations as a force for absorbing employment (MCA, MOE, & MOHRSS, 8 July 2022, opening)	Party and State direction can mobilise society	Enterprises that trade for social aims
United Kingdom	Left-behind places where social entrepreneurship should flourish (DLUHC, 2 February 2022, p. 216)	Dormant money and procurement reform can replace a strategy	What social enterprises need
United States	Low-income and distressed communities that need capital (CDFI Fund, 28 October 2022, release)	Mission lenders and tax credits can channel capital to them	Enterprises outside finance and federal contracting
France	SSE tools to be evaluated and the ESUS approval simplified (Prime Minister of France, 31 August 2022, p. 35)	A simpler approval and steady credits will let the SSE grow	The roadmap's measures and their cost
Germany	Common-good-oriented firms at a disadvantage (Federal Government of Germany, 26 January 2022, para. 154)	Removing disadvantages will close the gap	When, and with what money

3.2 THEORETICAL ANALYSIS: THEORETICAL VALIDITY AND RELEVANCE

Stephan et al. (2015) find, across 26 countries, that social entrepreneurship is more likely where government activism is higher — with institutional support rather than in the voids left by the state. US funding for community development lenders, Korea's funds of funds and France's work integration aid are consistent with it; Germany's unspent programme, the undecided British dormant causes and the studies and pledges of Japan and Germany are in tension with it.

On legal forms, theory counsels caution. Hansmann (1980) argued that the non-distribution constraint makes non-profit organisations trustworthy where others cannot judge what they receive, which supports Japan's non-profit worker cooperatives; but Ebrahim et al. (2014) argue that legal forms do only part of the work against mission drift and governance must do the rest, which supports the stricter US certification of CDFIs and warns against Korea's registration plan and Germany's lack of a form.

On finance and contracts, the evidence is mixed. Investors accept lower returns for impact mainly where they have a mission or face political pressure (Barber et al., 2021), which supports the US tax credits and Korea's partnerships with private money and is consistent with the small sums raised under the British relief. Limited evidence for social impact bonds (Fraser et al., 2018) accords with France's unspent impact contract credits and Japan's difficulty in setting outcome indicators, and applies equally to SIPPRA. In procurement, Erridge (2007) argues that commercial goals tend to

crowd out social ones, and leaders of social enterprises interviewed by Loosemore (2016) named contract size and tendering as barriers; Korea's priority purchasing and the British reserved competitions address this, but the British reform was a bill and France's plan is not binding (Table 3).

Table 3: Theoretical validity of the main policies

Theory	Claim	Policies consistent with it	Policies in tension with it
Institutional support (Stephan et al., 2015)	More social entrepreneurship with government activism	CDFI funding (United States); funds of funds (Korea)	Unspent programme (Germany); undecided causes (United Kingdom)
Non-distribution and mission (Ebrahim et al., 2014; Hansmann, 1980)	Non-distribution gives trust; form alone does not stop drift	Worker cooperatives (Japan); stricter certification (United States)	Registration (Korea); no form (Germany)
Resources (Austin et al., 2006; Doherty et al., 2014)	Distinct constraints of money, staff and measurement	Growth focus, lead universities (Korea)	No skills measure (United Kingdom, Germany)
Impact investment (Barber et al., 2021)	Lower returns accepted mainly by mission-driven investors	Tax credits (United States); partnerships (Korea)	Small tax relief (United Kingdom)
Outcome-based contracts (Fraser et al., 2018)	Evidence on social impact bonds is limited	Paying on verified results, two projects (United States)	Unspent credits (France); indicators (Japan)
Social procurement (Erridge, 2007; Loosemore, 2016)	Commercial goals dominate; size and tendering exclude	Priority purchasing (Korea); reserved competitions (United Kingdom)	No social value criterion (China); plan not binding (France)
Work integration (Garrow & Hasenfeld, 2014)	Under market logic, clients become units of labour	Wage floor (United States); territories (France)	Aid per post, contract cuts (France)

3.3 PRACTICAL ANALYSIS: PERFORMANCE, CONTRIBUTION AND IMPACT

By the end of 2022 much of the year's policy had not yet reached social enterprises (Table 4): the measures in force were mostly certifications, grant and loan rounds, appropriations, allocations, awards and a few rules, and announcements, studies, pledges, bills, drafts and proposals made up most of the rest.

Governments reported outputs, such as 428 certifications in Korea (MOEL, 21 December 2022, p. 1) and USD 5 billion of tax credits for 107 entities (CDFI Fund, 28 October 2022, release). The figures that cut against their narratives came from their own sources: Korean central bodies' 0.78 % share of purchases in a year of vaccine buying (MOEL, 27 April 2022, p. 2), falling JFC loans to NPO corporations (JFC, 30 May 2022), up to 5 % of British VCSEs in government contracting (DCMS, 30 August 2022, p. 4), 86,885 French work integration posts filled in 2021 against 94,645 agreed (Court of Audit, 2022, p. 62) and Germany's programme that had spent nothing by October (Federal Government of Germany, 15 November 2022, p. 4).

Contribution and impact were rarely shown: the CDFI Fund reported USD 8 of private investment for every USD 1 of federal investment in the tax credit (CDFI Fund, 28 October 2022, release), and

MOEL compared certified social enterprises' five-year survival, 86.4 %, with 32.1 % for ordinary firms, without controlling for selection (MOEL, 21 December 2022, p. 4). Performance measures serve purposes from control to learning (Behn, 2003); those of 2022 served mostly to promote (Table 5).

Table 4: Status of the main measures at the end of 2022

Country	In force or launched in 2022	Adopted, in force from 2023	Pending or announced
Korea	Certification; SVI screening; partnerships; growth focus; awards; designation; self-measurement; universities; purchasing	—	Registration (announced); rural bill (pending); Gwangju town (decided)
Japan	Workers' Cooperatives Act (from 1 October); grant window; JFC loans; bond indicators; forums; procurement policy	—	Form, certification, preference (studies); dormant, public-interest reforms (proposed)
China	Purchase of services; lottery fund; central grant; eldercare relief; grades; incubation; graduate jobs; disability plan	Cooperative rules (1 January 2023)	Charity Law revision (on the agenda); assistance law (planned)
United Kingdom	GBP 44 million; SITR; ownership fund; readiness competition	—	Dormant Assets Act 2022 (enacted; commencement by regulations); dormant causes (consulted on); Procurement Bill (pending)
United States	Wage rule (19 October; renewals); appropriations; tax credits; awards; emergency capital; recovery round; clean energy fund; cooperative grants; SIPPRA	Elective payment (tax years from 2023)	Certification (previewed); CRA rule, permanent NMTC (proposed); match review (consulted on)
France	Higher Council decree; SSE line; IAE aid; DLA; territories; purchasing plan; Secretary of State	Finance Act for 2023 (lines only as bill figures); spending report (June 2023)	ESUS simplification (announced)
Germany	KfW loans for cooperative shares; Commissioner	—	REACT with impact (draft title); strategies and pledges (announced)

4 POLICY LIMITATIONS

4.1 POLICY DEBATES, CONTESTED POINTS AND ISSUES

The policies of 2022 raised six points of contention (Table 6); the sharpest was whether the State should screen social enterprises or let them in more easily: Korea's plan would replace certification with registration (Section 2.1.1), while the US CDFI Fund moved the other way. The French rapporteur opposed the SSE credits for 2023 (National Assembly of France, 5 October 2022, p. 6), a deputy said the State underused the ESUS approval (National Assembly of France, 12 October 2022, p. 23), and in Germany the Budget Committee rejected an opposition motion to delete the new title for social entrepreneurship (Budget Committee of the German Bundestag, 18 November 2022, p. 33).

Table 6: Debates and contested points in the policies of 2022

Issue	What the governments set out	Point at issue
Screening or easier entry	Registration in place of certification (Korea); stricter certification (United States); certification studied (Japan)	Whether status without screening keeps the mission
Dormant money	Wider scheme enacted, causes undecided (United Kingdom); equity proposed (Japan); use pledged (Germany)	Additionality; who decides the causes
Tax reliefs for social investment	Small relief (United Kingdom); permanent credit proposed (United States)	Whether reliefs reach social enterprises
Social value in procurement	Bill pending (United Kingdom); non-binding plan (France); central purchasing low (Korea); preference studied (Japan); promise (Germany)	Price against social value; contract size
Legal form	Worker cooperatives (Japan); Charity Law pending (China); tied-assets pledge (Germany)	Form without enforcement
Wages and work integration	Wage floor (United States); aid per post and cut in subsidised contracts (France); quota and levy (China)	Who pays for disadvantaged workers

Source: IFEED analysis of the sources cited in Section 2.

4.2 THEORETICAL LIMITATIONS OF THE POLICIES

The first limitation is announcement as a substitute for support: Germany's strategies, programme and legal pledges, Japan's studies and the British commitment to consider the social economy promised the activism with which social entrepreneurship is more likely (Stephan et al., 2015), but did not deliver it. The second is status without governance: Korea's plan would keep a status while dropping much of its screening, and form or status without governance does not prevent mission drift (Ebrahim et al., 2014). The third is measurement: Korea's SVI and the British Social Value Model measure what sets social entrepreneurship apart (Austin et al., 2006), but select firms rather than evaluate policies (Behn, 2003). Finally, reliance on lenders, social organisations and cooperatives leaves out trading social enterprises, and recognition, Nicholls (2010) argues, legitimates the actors with the most resources; instruments borrowed across traditions of social enterprise (Kerlin, 2010) without their intermediaries risk incomplete transfer (Dolowitz & Marsh, 2000).

5 POLICY IMPLICATIONS

First, announced support should be delivered. Social entrepreneurship is more likely where government activism is higher (Section 3.2), and in 2022 much of that activism was promised: Germany's programme for social enterprises spent nothing by October, its strategy was not adopted, and the British dormant money had no causes. Governments should fund social enterprise through multi-year commitments with stated amounts and dates, as the US appropriations and Korea's partnerships do, and report what they spend.

Second, status should come with screening and enforcement. Korea's registration system, any form for Germany's common-good-oriented enterprises and Japan's corporate form for private bodies with public roles should specify who checks that assets stay locked and missions are kept, with the powers to do so, and should be judged by the governance they require rather than by the number of firms they admit; Japan's specified worker cooperatives and the US recertification of CDFIs show two ways to do so.

Third, public purchasing should weigh social value and be open to small suppliers. The British Procurement Bill should be enacted with a count of what VCSEs win, Korea should raise purchasing by central bodies, France should make its responsible purchasing schemes a duty that authorities keep, and Japan and Germany should turn their studies and promises into rules; smaller lots and lighter tenders would let social enterprises compete.

Fourth, finance should be realistic about returns. Investors accept lower returns for impact only in part; public money should draw them in on terms they will accept, as tax credits and partnerships with private money do, and a relief that raises little, as in the United Kingdom, should be redesigned or replaced. Outcome-based contracts should expand only with outcome measures that buyers can set and evaluations that show what they add.

Finally, policy should measure outcomes, not outputs. Counts of certifications, loans, awards and allocations do not show whether social enterprises reached the people and problems for which they were supported. Governments should evaluate their main programmes — Korea's certification and purchasing, Japan's dormant deposit grants, the US awards to community development lenders and France's work integration aid — against what would have happened without them, and publish the results.
